

An ISO 9001:2008 Company

Wafer Batter Mixer & Moulding Tank

MP100 / MP200

MP 200

Features

- ❖ Imported (GMP) Pump
- ❖ Dairy Quality Finish
- ❖ Skid Mounted Platform
- ❖ Timer for Auto Shut Off
- ❖ Easy Cleaning
- ❖ Modular Design

...better Mixers, better Products

R&D Engineers has a series of mixing plant depending on the capacity of the batter required to be made. Primary requirement for the production of quality batter is that all ingredients must be fully mixed together so that the batter will be homogeneous.

The particularly careful mixing procedure is achieved by the strong vertical currents induced in the batter. In the mixer center, the batter is induced to flow in the downward direction; on the periphery, the batter then flows in the upward direction.

The Batter Mixer is used for the fully automatic production of batter for feeding one or more Baking Plants either manual / automatic. Consistent batter is required for quality products (cones/wafers).

The age of the batter or the time between mixing and use has also a marked and effect on the sheet quality. To ensure that the Automatic Wafer Baking Machines are being supplied with batter that is always fresh. It is important to prepare smaller batches at a time.

FEATURES OF MP 200

MP200 is a sophisticated mixing plant in which an extra intermediate holding tank is provided along with the mixer. The selector Switch is provided for a variable mixing time. When mixing is complete the mixer shuts itself off automatically and the batter is pumped into an intermediate holding tank. A stirring device is supplied in the holding tank also. From this holding tank the batter can be continuously pumped to the batter depositing station. Batter Pump is easily accessible, easy to clean & made of Stainless Steel.

TECHNICAL DETAILS

Batter Mixer	MP100	MP200
Tank Capacity	100lts	200lts
Connected load in Kw (3 phase)	4.5	6.0
Length	1625	2000
Width	740	1100
Height	1690	1800
Net Weight (apprx)	200 Kgs	250 Kgs

MP 100
