

# “Special” Manual Wafer Biscuit Machine ‘WT-1 Spl’

*Your Profit's Producer*

## 'WT' Manual Creaming Wafer Plants

WT-1 Special Series Cream wafer plants are used for the manual operated production of cream wafer biscuits, for trial production or lab purpose.

They are characterized by simple sturdy and flexible mechanism

These machines are low cost and economical in operation, depending on the out put required, they can be supplied with 6,9 or 12 Wafer baking tongs.

### Baking Plates

The plates are made of special alloy. The selection of alloy and the casting procedure ensures dimensional stability, a homogeneous and dense surface, thermal stability, good heat accumulation characteristics and excellent thermal conductivity. Special finishing is done to ensure trouble free release of wafer sheets. The wafer thickness is quickly and easily adjusted by applying spacing shims.

### Batter Preparation

Wheat flour, maize starch, vegetable fat, preservatives, colors etc. is churned into a paste in the batter mixer.

### Machine Operation

The batter is fed to pre-heated wafer tongs by a special dosing device. Baking takes 1-3\* minutes. The baked sheets are cooled. Subsequent operations are creaming, sandwiching & cutting. The wafers are then packed.

People required

Operational area required

Capacity & Output details(6WT)

One Person is required to complete the baking cycle.

The total operational area required is about 750 Sq.Ft.

Depending on the type of product and mould design, it may vary.

### Technical Details :

<b>Dimensions</b>	
Length	860 mm
Width	640 mm
Height	1020 mm
<b>Weight</b>	<b>Net</b>
	<b>Gross</b>
	104 Kgs
	250 Kgs
Shipping Volume m3	1.0

\*Modifications Reserved

We are constantly guided by our principle of offering our customers better and better machines; to give increased efficiency and higher levels of automation. The technical data and illustrations are subject to change without notice
