

Machine for Ice Cream Cone (Za-1) Lab Model

Za1 Semi Automatic Series

The ZA1 Series is an efficient test baking tong for laboratory scale production of all kinds of ice cream cones, cups and hollow wafers. They are characterized by the highest standards in precision, operating ease and utmost durability. They are easy to use and robust.

Heating System

These Machines are supplied only with electrical heating. They are mainly used as a laboratory equipment, for the purpose of product development. The temperatures for the upper and lower plates can be adjusted by means of a thermostat.

Baking Moulds

The baking mouldes are manufactured from a very special quality cast alloy to ensure dimensional stability and a homogeneous and dense surface to enable excellent thermal stability and conductivity.

Operation

The moulds are opened and closed by levels. The moulds are provided with a special closing device. After the heating, the cones are automatically ejected into a container below, when the lower mould is opened. These machines can be operated by any person with ease.

Technical Data :

<u>Dimensions</u>	
Length	1030
Width	800
Height	1200
Electrical Load	4 Kw
<u>Weight</u>	
Net	150 Kgs
Gross	250 Kgs
Shipping Volume m ³	1.0

Standard Cones

Z-56D20

Z-49s10

Z-6073

Special Cones

Z-93D32

8200a

Z-5212

*Modifications Reserved

We are constantly guided by our principle of offering our customers better and better machines; to give increased efficiency and higher levels of automation. The technical data and illustrations are subject to change without notice
