

Wafer Batter Mixers Model - TM 5

....better Mixers, better Products

We have a series of mixing plant depending on the capacity of the batter required to be made. Primary requirement for the production of quality batter is that all ingredients must be fully mixed together so that the batter will be homogeneous.

The particularly careful mixing procedure is achieved by the strong vertical currents induced in the batter. In the mixer center, the batter is induced to flow in the downward direction; on the periphery, the batter then flows in the upward.

The Batter Mixer is used for the fully automatic production of batter for feeding one or more Baking Plants direction. either manual/automatic. Consistent batter is required for quality products(cones/wafers).

The age of the batter, or the time between mixing and use, has also a marked and effect on the sheet quality. To ensure that the Automatic Wafer Baking Machines are being supplied with batter that is always fresh, it is important to prepare smaller batches at a time.

Technical Details

BATTER MIXER	TM - 5
Tank Capacity	250 Ltrs
Connected load in Kw (3 phase)	5 HP / 3.7 Kw
Length	1570 mm
Width	1220 mm
Height	1360 mm
Net Weight (apprx)	300 Kgs

Dimensions taken with legs

*Modifications Reserved

We are constantly guided by our principle of offering our customers better and better machines; to give increased efficiency and higher levels of automation. The technical data and illustrations are subject to change without notice
