## Manual Wafer Baking Tong Spl. Edition for “Church Wafer” or Communion Wafers

## 'WT' Manual Creaming Wafer Tongs

"WT Series" Church wafer tongs are used for the manual operated production of cream wafer biscuits, for communion wafers.

They are characterized by simple mechanism that are sturdy and flexible.

These machines are low cost and economical in operation, depending on the out put required, they can be supplied individually or multiple wafer baking tongs.

### Baking Plates

The plates are made of special alloy. The selection of alloy and the casting procedure ensures dimensional stability, a homogeneous and dense surface, thermal stability, good heat accumulation characteristics and excellent thermal conductivity. Special finishing is done to ensure trouble free release of wafer sheets. The wafer thickness is quickly and easily adjusted by applying spacing shims

### Batter Preparation

Wheat flour, maize starch, vegetable fat, preservatives, colors etc. It is churned into a paste in the batter mixer.

### Machine Operation

The batter is fed to pre-heated wafer tongs by a special dosing device. Baking takes 1-3\* minutes. The baked sheets are cooled. Subsequent operations are cutting with the cutting punch provided.

They are then be suitably packed in airtight packaging.

#### Other design possibilities

#### Packed Case Accessories

#### Std. Accessories

Cutting Punch

Technical Details	
Plate Size in mm	270 x 370
Out put of wafer sheets/hr.	30*
Electric Heating: Connected load in KW	2.5
Current Consumption in KW/Hr.	2.0
Dimensions (approx.in mm)	
<b>Stations as pkd.</b>	<b>1 Tong X 1</b>
Length	750 mm
Width	440 mm
Height	300 mm
Net weight	100 Kgs
Weight incl.sea worthy packing (appx.)	175

#### \*Modifications Reserved

We are constantly guided by our principle of offering our customers better and better machines; to give increased efficiency and higher levels of automation. The technical data and illustrations are subject to change without notice
